PROFESSIONAL SUMMARY

Results-driven professional with experience across supply-chain, strategic-sourcing, and operations, plus hands-on analytics delivery in Power BI, Alteryx, and advanced Excel. Designs **go-to-market strategies, phased implementation roadmaps, and validated data solutions** that turn business needs decisions that clients can act on. Brings disciplined project management, cross-functional stakeholder coordination, and a **working interest in AI** and emerging tools to technology-enabled client delivery.

PROFESSIONAL EXPERIENCE

Supply Chain Engineer | kWh Motors Pvt Ltd - Bengaluru, India

Nov 2021 – March 2023

- Led end-to-end **Supply chain implementation of a \$2M electric two-wheeler program** - worked directly with stakeholders to understand workflows, requirements, and operational needs, translating business challenges into a structured implementation plan from concept through pre-production.
- Directed an **8-person cross-functional team** (mechanical, electrical, and quality) using **MS Project and Jira/Kanban** to manage workstreams, timelines, and deliverables -synchronizing supplier onboarding with regulatory homologation milestones (AIS-156, CMVR) to keep prototype commissioning on track toward start-of-production approval.
- Delivered **\$1M+ in tooling savings** on a \$2M prototype-stage program by leading a value-analysis/value-engineering (VA/VE) initiative that consolidated a fragmented supplier base into a rationalized panel of **75–100 qualified vendors**, and secured a further **\$40K** through pre-award engineering-cost negotiations.
- Drove a **12% reduction in bill-of-materials cost** (~\$200/unit on a 25,000-unit forecast) by leading structured RFx total cost-of-ownership modelling on localization-critical components, factoring in tax credits, customs duty, and freight, then renegotiating award terms before PO release.
- Reviewed and standardized supplier agreements, including **NDAs**, to ensure compliance and protect both parties' interests -contributing to repeatable governance documentation.

Assistant Manager, Sourcing & Vendor Development | Kannan Auto Traders - Chennai, India |

Sep 2020 – Oct 2021

- Managed sourcing, demand planning, and cost and inventory control for **European OEM brake-system components** (including Mercedes, BMW, and Audi), evaluating suppliers and negotiating terms to support cost-reduction targets.
- Systematized a tiered replenishment model (planned, min/max, safety stock) across a multi-brand European OEM parts catalogue spanning **seven premium vehicle brands**, sustaining service-level availability while keeping inventory and carrying costs under control.
- Streamlined and standardized **GRN and purchase-order processes** - three-way match, PO amendments, penalty calculation, and closure -improving processing consistency and supporting the GST input-credit recovery cycle.
- Maintained Excel-based tracking and KPI reporting for demand, cost, and inventory, enabling structured, data-led decisions for ownership.

TECHNICAL PROJECTS

Green Business Lab (GLOBE) - Graduate Board-Level Business Simulation | CMO & Acting COO | University of Ottawa| [Strategy Deck](#)

- Owned **go-to-market strategy** across a multi-cycle simulation, growing simulated revenue **176% (to \$211.1M)** and market share from 18.5% to 26.0% (2nd of four competitors) through repositioning, pricing, and incentive strategy.
- Launched two new offerings -a product-rental pilot and a replacement-component service -generating ~\$780K in incremental first-cycle revenue.
- Beat cycle revenue targets by up to 63% and lifted the market-evaluation score from **30.9 to 35.6** by iterating decisions on competitive-benchmarking and performance data.

Tools: Excel (pricing models, demand forecasting, cash-flow analysis) | Domain: Strategy / Go-to-Market | Methodology: GTM strategy, competitive benchmarking, data-driven iteration

FarmConnect -Digital-Platform, Go-to-Market & Implementation Strategy (Business Case) | Project Lead (7-person team) | University of Ottawa | [Business Case Report](#)

- Translated a digital-platform business challenge into an implementation plan, evaluating three go-to-market options with a five-year discounted-cash-flow model (~\$1.5M cost base) and recommending the path delivering **NPV of \$8.3M, 111% IRR, and a 1.3-year payback**.
- Built a 12-month, five-phase implementation roadmap (design → MVP → pilot → full launch) with a work-breakdown structure and cross-functional resourcing across UI, backend, QA, and DevOps, sequencing technical and go-to-market workstreams in parallel to compress time-to-launch.
- Coordinated stakeholder delivery by mapping 21 internal/external stakeholders on an influence-interest matrix, and ran a likelihood-consequence risk assessment pairing seven delivery risks with mitigation plans, including a two-factor-authentication control aligned to Canadian privacy requirements.

Tools: Excel | Domain: Digital Platform / Implementation Strategy| Methodology: Phased implementation, Agile, risk management.

Belfiore Flower Shop -Marketing Strategy & Digital Transformation Consulting | University of Ottawa| [Client Recommendation Deck](#)

- Led client discovery for a 24-year-established Ottawa business -interviewing the owner to map workflows, seasonal demand, and engagement gaps -and translated findings into a prioritized go-to-market strategy spanning 5+ initiatives.
- Synthesized a multi-source market-intelligence model (Statistics Canada, 2021 Census, 61-responder survey) sizing a national market exceeding CAD 1.3B, and benchmarked four competitors to isolate positioning whitespace.
- Designed a digital-transformation roadmap (website redesign, paid social, email automation) and delivered a client-ready recommendation package, packaging behavioural insights into repeatable, implementation-ready playbooks.

Tools: Excel (market sizing), Google Forms (primary survey — 61 respondents), Statistics Canada data | Domain: Digital Transformation / Client Advisory | Methodology: Client discovery, GTM strategy, playbook design

CRA T1 Filing Compliance Analytics | Power BI Dashboard -Self-Initiated| [Dashboard](#)

- Built an interactive Power BI dashboard (DAX, Power Query) on **31.2M CRA T1 returns**, surfacing **\$152.7M in late-filing penalties** and a national 93.7% electronic-filing benchmark to turn raw government compliance data into advisory insight for a tax-practice audience.
- Validated data integrity by identifying and correcting a measure-level double-counting error, packaging the result as a repeatable, documented analytical deliverable.

Tools: Power BI (Power Query), CRA Open Data | Domain: Tax / Public-Sector Compliance | Methodology: Data modelling, compliance analytics.

CRA GST/HST Tax Analytics | Alteryx Designer -Self-Directed Portfolio| [GitHub](#)

- Engineered an end-to-end **Alteryx Designer pipeline** that consolidated three CRA GST/HST datasets (2019–2023) into a single validated 70-record analytical model, automating multi-key joins to eliminate manual reconciliation.
- Built an automated reconciliation control validating Net Tax against the Collected-minus-ITC identity on every record (**100% integrity pass**), then ranked 13 jurisdictions across five fiscal years on ITC ratio and net-tax margin.
- Operationalized the pipeline as a reusable, refreshable workflow **-a repeatable delivery playbook** that re-runs on new annual data without rework.

TECHNICAL SKILLS

Client Delivery & Implementation

- Go-to-market strategy, client discovery & requirements gathering, implementation planning & roadmaps
- Project workstream management - MS Project, Jira/Kanban (Atlassian), Confluence
- Implementation documentation & repeatable delivery playbooks -Confluence, SharePoint

Digital & Emerging Technology

- Python, SQL
- Power BI, Tableau - data visualization & client reporting
- Microsoft 365 Suite (Excel, Word, PowerPoint, Outlook, Teams)

Data & Analytics

- Advanced Excel (Pivot Tables, VLOOKUP)
- Alteryx Designer - ETL/workflow automation, data validation & reconciliation

Platforms & Tools

- SAP/ERP (familiarity), cloud (Azure exposure)
- Atlassian (Jira, Confluence), MS Project
- Strategic sourcing, vendor governance, supply chain & operations optimization

PROFESSIONAL CERTIFICATIONS

- | | |
|--|----------------------|
| • Project Management Professional – PMP® (PMI) Certificate | Valid until Apr 2029 |
| • Microsoft Power BI Data Analyst (Coursera) Certificate | Issued on Jun 2026 |
| • Alteryx Designer Core (Alteryx) Certificate | Valid until Jun 2028 |
| • SQL Associate (DataCamp) Certificate | Valid until Nov 2027 |
| • Python Data Associate (DataCamp) Certificate | Valid until Nov 2027 |

EDUCATION

- | | |
|--|----------------------|
| Master of Engineering, Engineering Management University of Ottawa, Ottawa, ON | Sept 2023 – May 2025 |
| Bachelor of Technology, Mechanical Engineering SRM Institute of Science & Technology, Chennai, India | July 2015 – May 2019 |
